

Bratach Uimhir 4: Taisteal

2007-2010

Tá an-chuid oibre le déanamh an scoilbhliain seo.

Chun an Bratach Glas a bhuachaint arís, beimid ag plé leis an ábhar **taisteal**.

This year's theme enables us to study transport patterns.

It is the year 2100, and global warming has being stabilised, but it is still uncomfortably high temperature. The earth is almost constantly being bombarded by bad weather, from typhoons to acid rain. Much of the forest on the planet is destroyed, only small pockets remain, but no move is made to replenish them. As for the animal life, it is depleted dramatically, mostly confined to zoos, small remote areas and in factories (though these genetically engineered meat bags can hardly be called animals any more)...
